Area of District	21055. acres.
Number. of Inhabited Houses	491
Average. number per House	4.45.

D.P.M.

This Report has not been printed

R.E.M.

Infection Diseases

Six cases of Infection Disease occurred during the year. Comprising five of Scarlet Fever. & one of Erysipelas. No deaths occurred.

This is a distinct improvement on last year

Drainage

The drainage throughout the district is Satisfactory

Water Supply

Sherburn is well supplied & is of a Satisfactory character.

Ganton is well supplied & is Satisfactory

Stasston The Supply is the same as in former years. It is not altogether Satisfactory, as should a dry season occur it would be difficult to obtain water. There is only one pump in the village from which a supply may be obtained,

The position of this pump is not Satisfactory, it being on a lower level, than some of the farm yards, from which it might easily derive contamination.

Some years a boring was made above the village, it does not seem to have been made in a proper manner. & no supply was obtained

Folkton & Fleston are well supplied owing to their having a water works & piping system

Muston The Supply is ^{family} Satisfactory, & there have been no complaints about it
